Hey there,

Thank you for grabbing your free report. Although this report doesn't cost you anything, don't belittle it, it could make you lots of money on AdSense if you apply the methods taught here...properly!

I urge you to check out [Secret Google Tactics](#) for the complete course of making money from AdSense & also Adwords.

Let's take a look at why AdSense is such a powerful and appealing model for marketers.

1. You don't need capital to start this going! Fact is, you can get a free blogger account at [blogger.com](#), write your own content, sign up for a [free AdSense account](#) and slap on some Ads. Sure, I'm over-simplifying the whole process but the bottom line is you don't need money to start making money using this method!
2. People are always looking for information online. The internet is one big information highway. People are basically looking for one thing – Information. So the market, the niches and the potential is mind-boggling, virtually any sort of content will have an audience and will have monetization opportunities.
3. Finally, it isn't difficult to make money from AdSense. Sure, it isn't that easy, but it is indeed one of the easiest and least complicated methods of making money online. Newbies and advanced marketers both love AdSense!

### **Method #1:**

This method involves combining the articles and your site primarily by submitting content and articles to article directories.

The basic premise is simple. You write articles related to your AdSense website or blog and submit it to article directories like [Ezine Articles](#). From there, you'll get traffic from the article directories and also search engine traffic from Google first and slowly from Yahoo.

Bear in mind that you need to keep the content separate and unique, what I mean is that if you submitted an article to the article directories, DO NOT use it as content for your website. Similarly, DO NOT use existing content from your

sites and submit to article directories. Otherwise big G will come after you for having duplicate content! One very simple way to do this quickly is as follows:

1. Set up site or a blog
2. Get Private label rights articles and post them in your site or blog.  
Warning: You will suffer some penalty points from Google for this but this is ideal for setting up your sites very quickly. You can find tons of no-cost private label rights products online and in giveaway events.
3. Write 6 articles (about 300 words) and submit them by couples. What I mean is submit 2 articles, WAIT for it to get approved first, then submit the next 2. The 2 articles should never be in the same category.
4. Go on and create more such systems in different niches!

## **Method #2**

This method involves the traffic side of things. Because with AdSense, a few metrics stand out; your visitors, click-through rates and earnings per click. All things being equal, increasing any one of these will improve your earnings.

I call this method, the 'viral multiplier'. What it means is to make your site as viral as possible and your visitors to become your messengers! One simple way of doing so is to install a Viral Tell A Friend script inside your sites where they DON'T have to opt in and they can download the free report just by telling 2 friends.

This gets you people coming in on a fresh continual basis so even if your content stays stale, your traffic gets fresh...which means more chances of people clicking on your ads!

## **Method #3**

This is one of the 'sneaky' methods out there. I call this 'Web 2.0 Assault'. Sounds like you need to do a lot but the fact is that there are only a few key sites that you need. [Digg.com](http://Digg.com) and [stumbleupon.com](http://stumbleupon.com).

First submit a single page on your website (not the top level site) to Digg.com yourself 1<sup>st</sup>. You should get some traffic and slowly get noticed by Google. Also, you can sign up for 3 or 5 new separate accounts on Digg.com using different IDs and emails to dig your own posts. PLEASE PROCEED WITH CAUTION with this.

Do that and also, start 'stumbling' your pages after you downloaded Stumble Upon. I noticed one stumble is all it takes to get your traffic very quickly!

#### **Method #4**

This basically involves video marketing. Record a short clip of yourself basically based on the information of the private label articles. So example, if your niche is in Forex, you can record a short segment of yourself talking about what the risks there are, and what pitfalls to avoid.

You can do this fairly easily by reading out from your private label content. Remember to mention your site in the video itself to get people visiting your site.

Thereafter, submit it to video sharing sites like YouTube.com and tag it properly under the keywords and terms that the most popular videos in that niche are using!

Remember to post a comment after you submitted the articles with a link pointing back to your site!

So there you have it! 4 quick and free methods to make money from AdSense. I strongly recommend you take a look at '[Secret Google Tactics](#)' now to learn more about how to really EXPLODE your AdSense income. (And Clickbank/Paypal income too!)
